AP Physics B Practice Exam 1: Answers and Explanations ...

B The lower number must remain 6 for carbon because the number of protons is equivalent to the atomic number. The upper left number is the sum of the protons and neutrons ($6 + 7 = 13$). 37. D The pressure in a non-moving fluid depends strictly on the depth. 38. B Because the fluid is higher in column B, the air speed must be greater above column B. This must be due to a narrower tube.
