©Silberschatz, Korth and Sudarshan Accessing SQL from a Programming Language Not all queries can be expressed in SQL, since SQL does not provide the full expressive power of a general-purpose language. Non-declarative actions -- such as printing a report, interacting with a user, or sending the results of a query to a graphical user interface --

Chapter 5

CHAPTER5. Advanced SQL. Practice Exercises.

5.1 Describe the circumstances in which you would choose to use embedded SQL rather than SQL alone or only a general-purpose programming language.

Answer: Writing queries in SQL is typically much easier than coding the same queries in a general-purpose programming language. However, not all kinds of queries can be written in SQL. Also, non-declarative actions such as printing a report, interacting with a user, or sending the results of a query to a graphical user interface ...
