Data Communications and Networking: Forouzan, Behrouz A ...

Bridge: A network device that connects two networks together and only allows packets through that are needed. Switch: A network device that connects multiple devices together and filters packets based on their destination within the connected devices. Router: A device that receives and analyzes packets and then routes them towards their destination. In some cases, a router will send a packet to another router; in other cases, it will send it directly to its destination.
