It is a small device—typically mounted somewhere on the transmission—that determines how fast your vehicle is going by measuring the rotation of a toothed wheel on a shaft inside the transmission.

### **Easy Ways to Test a Vehicle Speed Sensor with a Multimeter**

A car's transmission speed sensor is responsible for working out how fast the vehicle is travelling, and communicating this information to the engine control unit (ECU) - the 'brain' of the car. When the ECU in an automatic car receives this information, it is able to select the optimal gear for efficient driving at that speed.
