## **Arthropods And Echinoderms Answer Key | www.dougnukem**

The arthropod's muscular system, in order to  
manipulate the many-jointed body, is more varied and  
complex than that of most other invertebrates.  
Arthropods have hearts, but much of the circulatory  
system is open. Rather than always passing through  
blood vessels, the blood collects in openings called  
sinuses that are found throughout the tissues.
