Climate change in the Arctic and Antarctic affect people outside of the polar regions in two key ways. First, physical and ecosystem changes in the polar regions have socioeconomic impacts that extend across the globe. Second, physical changes in the Arctic and Antarctic influence processes that are important for global climate and sea level.

### **National Weather Service**

Convection is the motion of a fluid driven by temperature differences across that fluid. When a fluid is heated, the region in closest contact with the heat source becomes less dense due to increased kinetic energy in the particles. The portion of fluid that is less dense then rises, while the denser portion of fluid sinks. The process repeats itself because the less dense fluids cool down as

### **Effects of climate change on oceans - Wikipedia**

Governance in higher education is the means by which institutions for higher education (tertiary or post-secondary education) are formally organized and managed (though often there is a distinction between definitions of management and governance). Simply, university governance is the way in which universities are operated. Governing structures for higher education are highly differentiated
