Shortness of breath or breathing abnormalities are among the most common symptoms at the end of life. Some degree of breathlessness is common in most people as they near death. Luckily, there are a few simple and effective treatments that can bring quick relief, such as deep-breathing exercises, relaxation techniques, oxygen, and, if needed, medications.

What Are the Seven Signs of Life? - Reference.com

The seven signs of life are moving, respiration, sensitivity, growth, reproduction, excretion and nutrition. All of these activities are present in living organisms. A non-living object sometimes manifests one or more of these activities but not all of them. All living things, including plants, move. Respiration goes beyond the breathing process. The general meaning of

respiration as it applies to a sign of life is that the chemical breakdown of complex organic substances, such as ...
