This unit replaces your old keyless entry system and gives you a 2-way functionality so you can see by the LEDs if your vehicle is locked/started/alarm going off. Also it gives you the cabin temperature of the vehicle so you don't enter the vehicle when it is not warm. Only downside is the distance.

You can't just push the button and release. For every command, you have to hold the button for about a full second and then it takes another full second for the car to respond. If you're doing remote start, it will take about 5 seconds for the car to begin starting after you've requested it to, so be patient.

The 2 way remote is a life saver, we just had a morning with the temp at -37 degrees and when I used the remote start it sent a signal back letting me know the car couldn't start and sure enough my battery was too dead to turn the car over. It's great not having to walk out to a cold car every morning. I would recommend this to a friend

Daniel - Austin, Texas Viper Color OLED 2-Way Remote Start + Security System This product does everything you need, the best part is by the LED confirmation, you will know if your car starts. My husband has a remote start the dealership put in, and if you're not close to the vehicle to hear the horn beep, you're out of luck.

The green confirmation lights are a must have because it lets you know that your car is locked or the remote start has activated without looking out the window to see if your car is running. I like the small size of the two way remote. This system is certainly nicer then anything that you could have installed at your car dealer.
